€ 90,- (für ÖGI Mitglieder frei)

DAS THEMA

- Classical functions of Barrier Membranes in bone regeneration are well known, but do we need them in all situations?
- Are all membranes behaving the same way?

In the present lecture we will shed light on this topic, sharing new findings and new approaches to maximize the outcomes of our regenerations, keeping an eye on the biology making it possible.

DER REFERENT

Jordi Caballé Serrano geboren in Barcelona, Spanien

University Education

- Dentistry degree, 2006-2011. Universitat Internacional de Catalunya (UIC), Barcelona, Spain.
- European Official Master in Biomaterials Research, 2012-2013. UIC.
- International PhD, 2013-2015. Awarded Cum Laude, awarded Valedictorian. UIC.
- Specialization on Oral Surgery 2013-2016. UIC.
- Dr. med. Dent, 2017-2018. University of Bern, Bern, Switzerland
- Spanish Professorship Habilitation (Profesor Contratado Doctor), 2019. Spain.

Academic Positions and professional

- Associate Researcher, Department of Periodontology, Dental School, Bern University.
- October 2019-present
- Associate Professor, Department of Oral Surgery, UIC. 2018-present
- Associate Researcher, Department of Oral Surgery and Stomatology, Dental School, Bern University. October 2014-July 2019
- Assistant Professor, Department of Oral Surgery, UIC. 2017
- Member of the consolidated research group "Tratamiento del Paciente Orofacial" (Spanish Oficial Reference: 2014 SGR 1353)
- Co-director of 3 PhD thesis
- Director of 11 defended Doctoral Thesis and 9 defended Master Thesis, UIC.
- Director ITI Study Club Barcelona.
- Private practice in Oral Surgery, Implantology and Periodontics. Barcelona 2016-present.
